

How to Weave a Putiputi!

Materials

#Flax

★Step 1: Split your flax in half, go as far down as you can until the flax starts to get stiff.

★Step 2: Split each side in half again the same length.

★Step 3: Fold the piece on the right over the other and then under the next-This is called weaving...

★Step 4: Continue weaving until you get to the end of the row.

★Step 5: Fold the last piece of the row over and then fold it again to face horizontal.

★Step 6: Keep weaving until you get to the end (Remember to leave space for tying.)

★Step 7: Tie the flax.-Take the two outside pieces and tie them around the middle strips.

★Step 8: Show your flax flower to all your friends.
